

Roofing Products for Specifiers

Orense & Cuervo Slate

Orense Premium

A pale blue grey slate with a riven surface and tightly dressed edge detail.

Cuervo Premium

A blue grey slate with a flat smooth surface and tightly dressed edge detail.

Quality

To assist specifiers in the selection of quality roofing materials, Raven Roofing Supplies and ECNS are working together to provide a range of high grade roofing slate for the specification market. Our aim is to ensure consistency of quality and shade and to give specifiers the confidence to use products they can rely on.

ECNS, a Spanish organisation with decades of experience in slate production and sales, is now providing Raven Roofing Supplies with an exclusive range of quality slates for the UK specification market.

Colour and Appearance

Both ranges of slates have been selected for their blue grey colour - more commonly seen in the Welsh slate historically used throughout the UK.

The Orense, with its riven surface, has been specified on many new build projects but can also be used to enhance a more rustic look - especially when used with handmade bricks or timber shiplap boards.

The Cuervo, with its smooth surface, gives a clean flat appearance and sits well with both modern and traditional building designs.

Orense Premium
